## PREFACE.

This edition of The General Catalogue follows closely the plan of the edition of 1902. It aims to present in Part I. the names of all Officers of the University from the organization of the first Board of Regents in 1837 to December 31, 1911; in Part II., the names of all graduates of the University down to the same date; in Part III., the names of all students who matriculated before September, 1907, and who have not taken a degree here; and also names of deceased students who matriculated after that date.

Part I. has been divided into appropriate groups, and each group arranged in chronological order according to date of original appointment. The group entitled "Members of the Faculties," has been subdivided according to rank, and each subdivision has been arranged according to the same plan; namely, seniority of appointment. The title in italics after each name is the one last held. Following this, in smaller type, is a list in each case of titles previously held at this University. No names are inserted in this group below the rank of Instructor.

Part II. is arranged alphabetically by Classes under each Department of the University. A list of Honorary Degrees, also arranged by years, follows the Departmental lists. In Departments where higher degrees are conferred for post-graduate study, the lists of such graduates will be found in each case at the end of the class lists of the Department.

Part III. has been arranged under one alphabet rather than by Departments and Classes, for the obvious reason that no precise arrangement of that kind was possible. In the Literary Department a large part of these non-graduates entered as special students, and never became identified with any Class. Others were members of different Classes, or of different Departments, at different times. In the Professional Schools the same is true in lesser degree. Nor would it have been possible always to separate "special students" from those who were candidates for a degree.

In Parts II. and III. an attempt has been made to record address and occupation of the living, and date and place of death of those not living. In case of the Professional Schools it has been assumed that persons are

following the occupations indicated by their professional degrees unless otherwise indicated. Where a graduate appears in more than one list, any subsequent recurrence of the name after the first entry is followed only by a back reference and by the address when known.

Special pains have been taken to record, with dates, academic degrees received elsewhere by our students. With reference to academic and other official positions, the editor has been much embarrassed in drawing the line of selection. County and municipal offices (excepting judgeships), postmasterships, membership in State legislatures and on boards of control, membership in learned societies, etc., have been generally omitted. To have made record of all these would have added many hundreds of items, and would have swelled the volume to undue proportions.

The necessity of making room for nearly fourteen thousand new names in this edition has compelled the condensation of the records of the earlier classes as found in the editions of 1891 and 1902. This applies especially to the military records. The new volume is therefore in some degree supplementary to the earlier ones. Some copies of the former editions are still to be had, should any one desire to possess them.

Service in the Mexican, Civil, and Spanish Wars is indicated by a dagger (†) prefixed to the name, and in most cases only the highest rank attained has been indicated. Considerable labor yet remains to be done to make this part of the record complete.

To names of persons known to be deceased an asterisk (\*) is prefixed. Much care has been taken to make the record complete in this respect, but some blanks yet remain to be filled. Doubtless a considerable number of the "unknowns" are deceased, for whom, owing to imperfect registration, it will not now be found practicable to make any further record. For the first time an effort has been made to record the ages of the deceased. Figures in parentheses following each record have been used to economize space.

The editor has proceeded on the principle of excluding all conjecture, no matter how plausible, when known to be conjecture. Much information, more or less probable, but still lacking confirmation, has been received, but not used. No doubt some matters here recorded rested more or less on conjecture in the minds of those reporting them; but all possible diligence has been exercised by the editor in checking error. Official records have been constantly referred to whenever accessible.

As indicated in the previous edition, no small difficulty has been encountered in making up the lists of non-graduates. The lists of graduates here given aggregate upwards of forty-three thousand names. It is manifest that in so large a number identical or similar names would appear in the same Department, or different Departments, often in close

proximity of time. Owing to the fact that back of 1864 no records of students have been found except the printed lists in the Annual Catalogues, that in many cases only initials are given in those early lists, and that numerous misprints occur in them, the difficulty of determining the identity or non-identity of the persons represented has often been very great. The care bestowed upon this portion of the work has, we believe, reduced the number of duplications very nearly or quite to zero; and the lists as now settled may be taken as a substantially complete roster of all persons who have matriculated at the University in the years covered by this record.

For twenty-five years and more the editor has devoted a good share of his leisure to the perfecting of the official records of the University, and especially as they relate to the men and women who have studied upon this hill and who have carried the name of Michigan to the ends of the earth. When he looks upon this great array and recalls their achievements in the work of the world he has some satisfaction in feeling that the task of making even so inadequate a record has been labor well spent.

# OFFICERS OF THE UNIVERSITY

## I. REGENTS.

Under the Acts of March 18 and June 21, 1837, the Board was originally made up of eighteen members, six *ex officio*, and twelve by appointment of the Governor with the advice and consent of the Senate. Of the twelve Regents named by Governor Mason, March 21, 1837, three were to hold office for one year, three for two years, three for three years, and three for four years; thereafter, the term was four years. In 1838 an additional Justice of the Supreme Court was authorized, which increased the number to nineteen; but in 1837 the office of Chancellor of State was abolished, thus reducing the total to eighteen again. The Governor was President of the Board; in his absence, the Lieutenant-Governor. In case of the absence of both, a President *pro tempore* was chosen by the Board. These conditions held till January 1, 1852, when a new Board chosen under the Constitution of 1850 took office.

The Constitution of 1850 provided that the Regents should be elected by the people voting at the April election of 1851, on the same ticket with the Circuit and Supreme Courts, one Regent to be chosen from each Judicial Circuit, to hold office for six years from January 1 following the election. In case of death or resignation the vacancy was filled by popular election. In practice vacancies were not promptly filled, sometimes not at all. The first Board chosen under this arrangement took office January 1, 1852, and consisted of eight members. Six years later the number was increased to ten.

In 1861 the Constitution was amended so as to provide for a Board of eight Regents to be chosen on a general ticket at the April election of 1863 and to take office January 1 following. These were to be divided into four classes to serve two, four, six, and eight years respectively. Thereafter, two were to be elected every second year, at the April election, for the full term of eight years. In case of vacancy from any cause the Governor was to appoint. This arrangement still continues.

In all, one hundred and forty persons have borne the title. Of the entire number, thirteen have served for ten years or more. The longest period was eighteen years (Edward Carey Walker, 1864-1882) and the next longest seventeen years (Eloa Farnsworth, 1837-1842, 1846-1858). Two served sixteen years (Roger Williams Butterfield, 1888-1904; and Frank Ward Fletcher, 1894-1910).
